

## Hon. Leward J. LaFleur

FOR IMMEDIATE RELEASE

Marion County Judge

### Coronavirus in Marion County

The County Judge Leward J. LaFleur was notified today that an employee of Marion County has had direct contact with a person who has tested positive for COVID-19. The employee has since also tested positive for COVID-19.

The Department Head took immediate action to protect the welfare and health of the public and Marion County Employees in two ways, by closing the office to the public immediately and notifying the County Judges office (Judge Leward J. LaFleur) and the EMC (Emergency Management Coordinator) Sheriff David Capps. I applaud those efforts.

We have taken the appropriate steps to secure the health and welfare of the public and employees. With this virus becoming something that we will have to deal with now and in the future, the transparency of that office will hopefully help save countless people from exposure. A large number of Marion County employees have been tested today and some results are pending.

Human coronaviruses are most commonly spread through respiratory droplets. Symptoms include fever, cough and shortness of breath. People at higher risk for serious complications are those with underlying health conditions and with people over the age of 65. Health care providers and epidemiologists will remain in contact with this confirmed individual, as well as with anyone that interacted with this individual if they believe they may be at risk of infection. Marion County residents are reminded to continue to practice healthy, sanitary habits including:

- Wash your hands often with soap and water for at least 20 seconds, especially after going to the bathroom; before eating; and after blowing your nose, coughing, or sneezing. If soap and water are not available, use an alcohol-based hand sanitizer with at least 60% alcohol.
- Avoid touching your eyes, nose, and mouth with unwashed hands.
- Avoid close contact with people who are sick.
- Stay home when you are sick.
- Cover your cough or sneeze with a tissue, then throw the tissue in the trash.
- Clean and disinfect frequently touched objects using a regular household cleaning spray or wipe.

If you are experiencing fever, cough or difficulty breathing, been exposed to a sick traveler or been exposed to a person with COVID-19 in the last 14 days, contact your healthcare provider immediately.

**Be sure to call before going to your doctor or an emergency department to prevent any potential spread.**
